	Resulting Dynamic load	675kg (6)			

(1) Dependent on application and load weight.

(2) Load detail is based on a boxed product in a brick stacked formation distributed evenly across the entire deck surface and stretched wrapped.

(3) Maximum downward compression strength when on the floor or similar flat surface.

(4) Maximum recommended load (based on (2)) in open beamed racking systems - based on UK ambient temperature and relative humidity in indoor storage for up to six months duration.

(5) For use on automated and gravity fed conveyor systems.

(6) Allows for 10% above maximum load for accelerated load effect when in transit.
